

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2000-0169-C - ORDER NO. 2000-596

JULY 24, 2000

IN RE: Application of TelePacific, Inc. for a) ORDER
Certificate of Public Convenience and) GRANTING
Necessity to Provide Resold and Facilities-) CERTIFICATE
Based Local Exchange and Interexchange)
Telecommunications Services within the State)
of South Carolina.

This matter comes before the Public Service Commission of South Carolina (the "Commission") by way of the Application of U. S. TelePacific Corporation dba TelePacific Communications ("TelePacific" or the "Company") requesting a Certificate of Public Convenience and Necessity authorizing it to provide resold and facilities-based local exchange and intrastate interexchange telecommunications services within the State of South Carolina. The Company's application was filed pursuant to S.C. Code Ann. §58-9-280(B) (Supp. 1999) and the Regulations of the Public Service Commission of South Carolina.

By letter, the Commission's Executive Director instructed TelePacific to publish, one time, a prepared Notice of Filing in newspapers of general circulation in the areas affected by the Application. The proposed Notice of Filing was to inform interested parties of the manner and time in which to file the appropriate pleadings for participation in the proceedings. TelePacific complied with this instruction and provided the Commission with proof of publication of the Notice of Filing.

A Petition to Intervene was received from the South Carolina Telephone Coalition (“SCTC”) on June 2, 2000. Thereafter, on June 14, 2000, Counsel for SCTC filed with the Commission a Stipulation in which TelePacific stipulated that it would only seek authority in non-rural local exchange (“LEC”) service areas of South Carolina and that it would not provide any local service to any customer located in a rural incumbent’s service area, unless and until TelePacific provided written notice of its intent prior to the date of the intended service. TelePacific also stipulated that it was not asking the Commission to make a finding at this time regarding whether competition is in the public interest for rural areas. TelePacific agreed to abide by all State and Federal laws and to participate to the extent that it may be required to do so by the Commission in support of universally available telephone service at affordable rates. The SCTC withdrew its opposition to the granting of a statewide Certificate of Public Convenience and Necessity to TelePacific provided the conditions contained in the Stipulation are met. The Stipulation is approved and attached as Order Exhibit 1.

A hearing was commenced on July 13, 2000, at 12:30 p.m., in the Commission’s Hearing Room. The Honorable William Saunders, Chairman, presided. TelePacific was not represented by counsel. Adelaide D. Kline, Staff Counsel, represented the Commission Staff.

Jane Delahanty, Assistant Vice President, Regulatory Affairs of TelePacific, appeared and offered testimony in support of the Company’s application. As Assistant Vice President, Regulatory Affairs of TelePacific, Ms. Delahanty is responsible for applying for all certifications in states designated in the Company's business plan, supervises the development of tariffs, and administers those tariffs to ensure they are

uniformly applied in various jurisdictions. TelePacific is a California corporation that was incorporated July 17, 1996, and has received authorization to operate as a foreign corporation in the State of South Carolina by the Secretary of State. The record reveals the Company is currently providing resold and facilities-based interexchange and local exchange service in California and expects to begin operation of its services in Nevada before the end of 2000. According to the testimony, TelePacific is in the process of applying for authorization to provide competitive local exchange and interexchange services in approximately thirty states.

Upon receiving certification from the Commission, TelePacific will initially resell the facilities of the existing local exchange carriers (LECs) or underlying carriers that presently service South Carolina and will primarily resell the facilities and services of BellSouth. TelePacific will also use unbundled network elements and services purchased from BellSouth and other incumbent local exchange providers, where applicable, to provide service through TelePacific's facilities. The Company intends to offer a full array of local exchange and interexchange services to both business and residential customers. The testimony reveals the Company will offer the same local exchange and interexchange services as it currently offers in California, as well as basic dial tone services, ancillary services, internet services, and digital services. The Company's interexchange services will include 1+ and 101XXXX outbound dialing, 800/888 toll-free inbound dialing, calling cards, and data services. TelePacific's local exchange services for business and residence telecommuter customers will enable customers to originate and terminate local calls in the local calling area served by other LECs. Switched local exchange services will include basic service, trunks, carrier access, and other switched local services; non-

switched local services, (e.g, private line); centrex and/or centrex-like services; digital subscriber line, ISDN, and other high capacity services.

Ms. Delahanty presented testimony on TelePacific's technical, financial, and managerial ability to offer services in South Carolina. When TelePacific installs facilities in South Carolina, it will probably use the following configuration of equipment:

TelePacific will provide voice, high speed data and internet access services through a combination of the latest technology switching and transport media comprised of the Lucent #5 ESS 13 switch, ADSL/SDSL transport and Internet service equipment and the latest Optical multiplexer DACs configurations. The hub portion of the switch will interconnect with the public switched network on Signaling System 7 ("SS7") or Feature Group D ("FGD") facilities. Services will be delivered over a combination of delivery mechanisms including leased facilities, incumbent local carriers' unbundled network elements, utilizing both copper and fiber transport media, as well as via TelePacific constructed facilities.

The record reveals that for interexchange service, TelePacific intends to utilize Sprint as its underlying carrier. The record further reveals that at the time of hearing TelePacific had not yet begun negotiating an interconnection agreement in South Carolina. TelePacific also operates a customer service department which responds to customer inquiries; customers may call 888-353-7224 toll free or the main business number 213-213-3000, Pacific time. These numbers will be printed on customers' monthly billing statements. In addition, customers may contact TelePacific via its website at www.TelePacific.com. Customers can view the Company's Website and request immediate call back from the customer service department. The Company's customer

service representatives are prepared to respond to a broad range of service matters, including inquiries regarding: (1) the types of services offered by TelePacific and the rates associated with such services; (2) monthly billing statements; (3) problems or concerns pertaining to a customer's current service; and (4) general service matters. Ms. Delahanty is the Company's regulatory contact person.

Ms. Delahanty's testimony states TelePacific has sufficient technical resources and ability to provide telecommunications services it proposes to provide in South Carolina. She stated the Company will do its own billing with the company name, telephone number and Website address to appear on the bill. Ms. Delahanty offered that TelePacific Communications will use the following sales methods to market its services in South Carolina: (1) web-based sales; (2) direct sales; and (3) strategic marketing to large accounts by agents and wholesalers. She further testified the Company's initial target market in South Carolina will be small businesses but that the Company is also considering residential services primarily in service areas which are "customer class neutral" such as DSL home office offerings. The record reveals that TelePacific's planning/research personnel have indicated an interest in the Rock Hill and Greenville areas in South Carolina with services expected to be available sometime in 2001. Ms. Delahanty testified that TelePacific will use Letters of Authorization for every order to verify that a customer wishes to switch its services to TelePacific. She stated the Federal Communications Commission's guidelines will be followed for a long distance transfer. She further stated the Company does not intend to use telemarketing; she also testified the Company is aware of the Commission's guidelines on telemarketing.

Ms. Delahanty testified the Company's personnel represent a broad spectrum of business and technical disciplines, possessing many years of individual and aggregate experience in incumbent and competitive local exchange telecommunications services. The record reveals TelePacific has sufficient technical, financial, and managerial resources and ability to provide the telecommunications services for which authority is sought in South Carolina. Mr. David Glickman is the founder and Chairman of the Board of TelePacific. Mr. Glickman has extensive entrepreneurial experience; TelePacific is the third company he has founded and his management background includes experience in financial fundraising. Mr. Ken Bisnoff is Vice President, Sales and Marketing. He has more than a decade of sales performance in the telecommunications industry. Prior to joining TelePacific, Mr. Bisnoff was Vice President of Carrier Sales for CallManage, Inc., a developer of least call routing technologies for small to medium-sized businesses. Mr. Michael Lee is TelePacific's Chief Technology Officer. He has more than ten years of experience in the high technology and Internet industries. Mr. Philip Pucci is Executive Vice President and he has nineteen years of operations and engineering experience in the telecommunications and broadcast industries. Ms. Delahanty testified TelePacific has recently hired a new Chief Executive, Mr. Richard L. Kimsey, whose background includes Sprint Wireless in the southeastern region of the United States.

Ms. Delahanty also testified that TelePacific has the financial resources and ability to provide telecommunications services in South Carolina. She offered that while the Company has not been quite profitable yet, it has just received private placement funding in the amount of \$125M specifically for the purpose of expansion. David Benwell, Chief Financial Officer of TelePacific, will be the Company's financial contact

person. The Company requested the Commission's permission to be exempt from any record-keeping rules or regulations that might require the Company to maintain its financial records in conformance with the Uniform System of Accounts. According to the record, TelePacific currently maintains its book of accounts in accordance with the Generally Accepted Accounting Principles ("GAAP").

TelePacific also requested a waiver of S.C. Code Ann. Regs. 103- 610 and 103- 631 so that the Company will not be required (1) to publish local exchange directories or (2) maintain its records in South Carolina. According to the record, TelePacific will make arrangements with the incumbent local exchange carriers whereby the names of TelePacific's customers will be included in the directories published by the incumbent local exchange carriers. The Company wishes to maintain its records out of state. In addition, TelePacific requests a waiver of any reporting requirements which, although applicable to incumbent local exchange carriers, are not applicable to competitive providers such as TelePacific because it is the Company's position that these requirements (1) are not consistent with the demands of the competitive market; or (2) they constitute an undue burden on a competitive provider, thereby requiring an inefficient allocation of its limited resources.

Upon receiving certification from the Commission, Ms. Delahanty testified TelePacific will abide by and comply with the Commission's rules and regulations and Commission Orders in its operations in South Carolina. Further, the testimony reveals TelePacific has never had an application for a certificate of public convenience and necessity denied nor has the Company ever been the subject of an investigation by a state regulatory body or the Federal Communications Commission. Additionally, as of the

hearing date, TelePacific had not provided any intrastate telecommunications services within the State of South Carolina.

After full consideration of the applicable law, the Company's Application, and the evidence presented at the hearing, the Commission hereby issues its findings of fact and conclusions of law:

FINDINGS OF FACT

1. TelePacific is organized as a corporation under the laws of the State of California and has received a certificate from the South Carolina Secretary of State to transact business within South Carolina as a foreign corporation.
2. TelePacific wishes to provide local exchange services and interexchange services within the State of South Carolina.
3. The Commission finds that TelePacific possesses the technical, financial, and managerial resources sufficient to provide the service requested.
4. The Commission finds that TelePacific's "provision of service will not adversely impact the availability of affordable local exchange service." S.C. Code Ann. §58-9-280(B)(3) (Supp. 1999).
5. The Commission finds that TelePacific will support universally available telephone service at affordable rates.
6. The Commission finds that TelePacific will provide services which will meet the service standards of the Commission.
7. The Commission finds that the provision of local exchange service by TelePacific "does not otherwise adversely impact the public interest." S.C. Code Ann. §58-9-280(B)(5) (Supp. 1999).

CONCLUSIONS OF LAW

1. Based on the above findings of fact, the Commission determines that a Certificate of Public Convenience and Necessity should be granted to TelePacific to provide competitive resold and facilities-based intrastate local exchange services only to customers located in the non-rural areas of South Carolina. The terms of the Stipulation between TelePacific and the SCTC are approved, and adopted as a portion of this Order. Any proposal to provide local exchange service to a customer in a rural incumbent LEC's service area is not included in the instant grant of authority. Further, the Company is granted authority to provide facilities-based and resold intrastate interLATA service and to originate and terminate toll traffic within the same LATA, as set forth herein, through the resale of intrastate Wide Area Telecommunications Services (WATS), Message Telecommunications Service (MTS), directory assistance, travel card service or any other services authorized for resale by tariffs of carriers approved by the Commission.

2. With regard to the interexchange service offerings of TelePacific, the Commission adopts a rate design which includes only maximum rate levels for each tariff charge. A rate structure incorporating maximum rate levels with the flexibility for adjustment below the maximum rate levels has been previously adopted by the Commission. In Re: Application of GTE Sprint Communications Corporation, etc., Order No. 84-622, issued in Docket No. 84-10-C (August 2, 1984).

3. TelePacific shall not adjust its interexchange rates below the approved maximum level without notice to the Commission and to the public. TelePacific shall file its proposed rate changes, publish its notice of such changes, and file affidavits of

publication with the Commission two weeks prior to the effective date of the changes. However, the public notice requirement is waived, and therefore not required, for reductions below the maximum cap in instances which do not affect the general body of subscribers or do not constitute a general rate reduction. In Re: Application of GTE Sprint Communications, etc., Order No. 93-638, issued in Docket No. 84-10-C (July 6, 1993). Any proposed increase in the maximum rate level for interexchange services reflected in the tariff which would be applicable to the general body of the Company's subscribers shall constitute a general ratemaking proceeding and will be treated in accordance with the notice and hearing provisions of S.C. Code Ann. §58-9-540 (Supp. 1999).

4. If it has not already done so by the date of issuance of this Order, TelePacific shall file its revised local and long distance tariffs and an accompanying price list within thirty (30) days of receipt of this Order. The revised tariff shall be consistent with the findings of this Order and shall be consistent with the Commission's Rules and Regulations.

5. TelePacific is subject to access charges pursuant to Commission Order No. 86-584 in which the Commission determined that for access purposes resellers should be treated similarly to facilities-based interexchange carriers.

6. With regard to the Company's resale of interexchange service, an end-user should be able to access another interexchange carrier or operator service provider if the end-user so desires.

7. TelePacific shall resell the services of only those interexchange carriers or LECs authorized to do business in South Carolina by this Commission. If TelePacific changes underlying carriers, it shall notify the Commission in writing.

8. With regard to the origination and termination of toll calls within the same LATA, TelePacific shall comply with the terms of Order No. 93-462, Order Approving Stipulation and Agreement, in Docket Nos. 92-182-C, 92-183-C, and 92-200-C (June 3, 1993), with the exception of the 10-XXX intraLATA dialing requirement, which has been rendered obsolete by the toll dialing parity rules established by the Federal Communications Commission, pursuant to the Telecommunications Act of 1996 (See, 47 CFR 51.209).

9. TelePacific shall file annual surveillance reports on a calendar or fiscal year basis with the Commission as required by Order No. 88-178 in Docket No. 87-483-C. The proper form for these reports is indicated on Attachment A. Attachment A consists of two pages for annual information on South Carolina operations for interexchange companies and AOS'.

10. Title 23, Chapter 47, South Carolina Code of Laws Ann., governs the establishment and implementation of a "Public Safety Communications Center," which is more commonly known as a "911 system" or "911 service." Services available through a 911 system include law enforcement, fire, and emergency medical services. In recognition of the necessity of quality 911 services being provided to the citizens of South Carolina, the Commission hereby instructs TelePacific to contact the appropriate authorities regarding 911 service in the counties and cities where the Company will be operating. Contact with the appropriate 911 service authorities is to be made before

beginning telephone service in South Carolina. Accompanying this Order is an information packet from the South Carolina Chapter of the National Emergency Number Association (“SC NENA”) with contact information and sample forms. The Company may also obtain information by contacting the E911 Coordinator at the Office of Information Resources of the South Carolina Budget and Control Board. By this Order and prior to providing services within South Carolina, TelePacific, shall contact the 911 Coordinator in each county, as well as the 911 Coordinator in each city where the city has its own 911 system, and shall provide information regarding the Company’s operations as required by the 911 system.

11. The Company shall, in compliance with Commission regulations, designate and maintain an authorized utility representative who is prepared to discuss, on a regulatory level, customer relations (complaint) matters, engineering operations, tests and repairs. In addition, the Company shall provide to the Commission in writing the name of the authorized representative to be contacted in connection with general management duties as well as emergencies which occur during non-office hours.

TelePacific shall file the names, addresses and telephone numbers of these representatives with the Commission within thirty (30) days of receipt of this Order. Attachment B shall be utilized for the provision of this information to the Commission. Further, the Company shall promptly notify the Commission in writing if the representatives are replaced.

12. TelePacific shall conduct its business in compliance with Commission decisions and Orders, both past and future, including but not limited to, any and all

Commission decisions which may be rendered in Docket No. 96-018-C regarding local competition.

13. The Company is directed to comply with all Rules and Regulations of the Commission, unless a regulation is specifically waived by the Commission.

14. TelePacific shall file annual financial information in the form of annual reports and gross receipts reports as required by the Commission. The annual report and the gross receipt report will necessitate the filing of intrastate information. Therefore, TelePacific shall keep financial records on an intrastate basis for South Carolina to comply with the annual and gross receipts filings. Attachment C shall be utilized by the Company to provide the Commission with annual financial information on the Company's intrastate operations. Attachment C consists of four pages and it is entitled "Annual Report for Competitive Local Exchange Carriers."

15. By its Application, TelePacific requested waivers from Commission requirements (1) of publishing a directory, (2) of maintaining its books and records in conformance with the Uniform System of Accounts, and (3) of any reporting requirements which are not applicable to competitive providers. The Commission finds the reasoning behind TelePacific requests for waivers of publishing a directory and maintaining its books and records in conformance with the Uniform System of Accounts reasonable and hereby grants the waivers of these regulations. The Commission denies the Company's request for a waiver of any reporting requirements which are applicable to incumbent LECs. In the future, upon the request of the Company, this Commission may grant a waiver of a specific regulation if the Company demonstrates that compliance with the regulation introduces unusual difficulty and that the waiver is in the public

interest. However, TelePacific is directed to comply with all Rules and Regulations of the Commission, unless a regulation is specifically waived by the Commission.

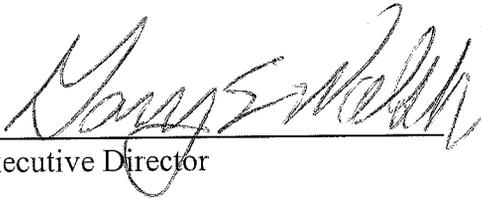

16. This Order shall remain in full force and effect until further Order of the Commission.

Docket No. 2000-0169-C

Re: Application of U.S. TelePacific Corp. d/b/a)
TelePacific Communication for a Certificate of)
Public Convenience and Necessity to Provide)
Resold and Facilities-based Local Exchange and)
Interexchange Telecommunications Services in)
the State of South Carolina)

STIPULATION

The South Carolina Telephone Coalition ("SCTC") (see attachment "A" for list of companies) and U.S. TelePacific Corp. d/b/a TelePacific Communication ("TelePacific") hereby enter into the following stipulations. As a consequence of these stipulations and conditions, SCTC does not oppose TelePacific's Application. SCTC and TelePacific stipulate and agree as follows:

1. SCTC does not oppose the granting of a statewide Certificate of Public Convenience and Necessity to TelePacific, provided the South Carolina Public Service Commission ("Commission") makes the necessary findings to justify granting of such a certificate, and provided the conditions contained within this stipulation are met.
2. TelePacific stipulates and agrees that any Certificate which may be granted will authorize TelePacific to provide service only to customers located in non-rural local exchange company ("LEC") service areas of South Carolina, except as provided herein.
3. TelePacific stipulates that it is not asking the Commission to make a finding at this time regarding whether competition is in the public interest for rural areas.
4. TelePacific stipulates and agrees that it will not provide any local service, by its own facilities or otherwise, to any customer located in a rural incumbent LEC's service area, unless and

until TelePacific provides such rural incumbent LEC and the Commission with written notice of its intent to do so at least thirty (30) days prior to the date of the intended service. During such notice period, the rural incumbent LEC will have the opportunity to petition the Commission to exercise all rights afforded it under Federal and State law. Also, TelePacific acknowledges that the Commission may suspend the intended date for service in rural LEC territory for ninety (90) days while the Commission conducts any proceeding incident to the Petition or upon the Commission's own Motion, provided that the Commission can further suspend the implementation date upon showing of good cause.

5. TelePacific stipulates and agrees that, if TelePacific gives notice that it intends to serve a customer located in a rural incumbent LEC's service area, and either (a) the Commission receives a Petition from the rural incumbent LEC to exercise its rights under Federal or State law within such 30-day period, or (b) the Commission institutes a proceeding of its own, then TelePacific will not provide service to any customer located within the service area in question without prior and further Commission approval.

6. TelePacific acknowledges that any right which it may have or acquire to serve a rural telephone company service area in South Carolina is subject to the conditions contained herein, and to any future policies, procedures, and guidelines relevant to such proposed service which the Commission may implement, so long as such policies, procedures, and guidelines do not conflict with Federal or State law.

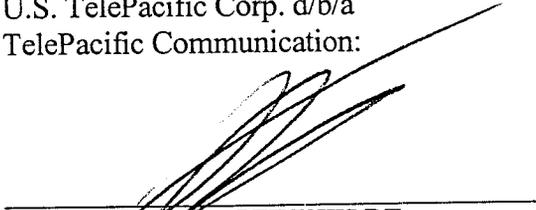

7. The parties stipulate and agree that all rights under Federal and State law are reserved to the rural incumbent LECs and TelePacific, and this Stipulation in no way suspends or adversely affects such rights, including any exemptions, suspensions, or modifications to which they may be entitled.

8. TelePacific agrees to abide by all State and Federal laws and to participate, to the extent it may be required to do so by the Commission, in the support of universally available telephone service at affordable rates.

9. TelePacific hereby amends its application and its prefiled testimony in this docket to the extent necessary to conform with this Stipulation.

AGREED AND STIPULATED to this 13th day of June, 2000.
